Report PLUS

Report Generator Toolkit
Developer: Jibin Baby

Description

Report Plus is an online portal that an educational institution can use to store and retrieve student information like term marks, class details etc. The app also provides a centralized way of storing this information that makes it easy for all members of the institution to view and update the same. It eradicates the hassle of manually storing student details by paperwork and provides a quick way of accessing the data.

User is also provided with an option to generate a report card for each student based on the updated details which will be shared to the student or their parents in and online medium.

Modules

- **Subjects**:

  Subject module can be used to create a list of subjects and each subject can be added to a class. All the subjects that are taught in the institution can be included here. Users can view and edit the subjects based on the requirements.

- **Classes**
  Class module shows the list of classes that are created by the institution. Each class will be holding information like class name, section, class teacher, class strength and the list of subjects that are taught in the class. The list of subjects come from the subject module. User can view and edit the classes based on the requirements.

- **Students**
  Students' module helps the user to create a student with information like student name, roll number, parent name and the class he/she belongs to. User can assign the student to a specific class from the list of classes provided that are created using the classes module.
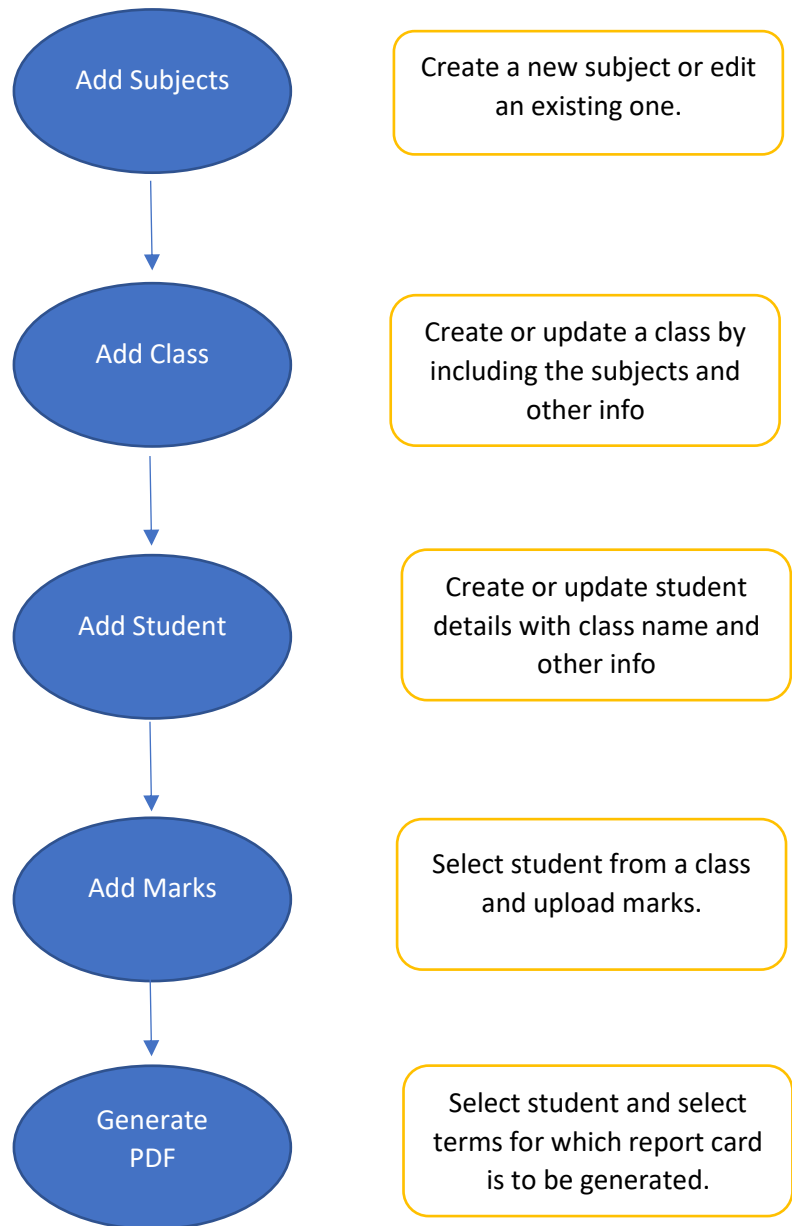

- **Add Marks**
  Add marks module helps the user to select a student from a particular class and update his/her marks. There are four different time periods provided: first mid-term, first term, second mid-term and second term. User can select the time-period and upload the marks.

- **Generate PDF:**
  Generate pdf module is all about creating a report card of a student that will contain subject marks in each term and other information like class name, class teacher name, roll number etc. User has the convenience to generate report cards for specific terms or for all terms.

User Workflow:

Add Subjects — Create a new subject or edit an existing one.

↓

Add Class — Create or update a class by including the subjects and other info

↓

Add Student — Create or update student details with class name and other info

↓

Add Marks — Select student from a class and upload marks.

↓

Generate PDF — Select student and select terms for which report card is to be generated.
